Define the Problem Statements

Date	26 June 2026
Team ID	
Project Name	House Rent
Maximum Marks	2 Marks

Customer Problem Statement:

This problem statement helps identify the challenges faced by renters and property owners during the house rental process. It focuses on understanding user needs, improving the rental experience, and developing an efficient, secure, and user-friendly platform. By analysing these challenges, the House Rent system aims to provide verified property listings, simplified booking, secure payment processing, and effective property management, ensuring a seamless experience for both renters and owners.

Problem Statements for House Rent:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because
PS-1	A renter looking for a rental property	Find and book a suitable house online	It is difficult to find verified properties and communicate with owners efficiently	Traditional rental methods are time-consuming and lack transparency
PS-2	A property owner	List and manage my rental properties while handling booking requests	Managing inquiries, approvals, and payments manually is inefficient	There is no centralized platform to manage the entire rental process
